

C Programming Assignment – 2
BCA 1st Sem, Dept of Computing & Analytics, NSHM, Kolkata

1. Write a program in C to store elements in an array and print it.
2. Write a program in C to read n number of values in an array and display it in reverse order.
3. Write a program in C to find the sum of all elements of the array.
4. Write a program in C to copy the elements of one array into another array.
5. Write a program in C to count a total number of duplicate elements in an array.
6. Write a program in C to print all unique elements in an array.
7. Write a program in C to merge two arrays of same size sorted in descending order.
8. Write a program in C to count the frequency of each element of an array.
9. Write a program in C to find the maximum and minimum element in an array.
10. Write a program in C to separate odd and even integers in separate arrays.
11. Write a program in C to sort elements of array in ascending order.
12. Write a program in C to sort elements of the array in descending order.
13. Write a program in C to insert New value in the sorted array.
14. Write a program in C to insert New value in the array at any given position.
15. Write a program in C to delete an element at desired position from an array.
16. Write a program in C to find the second largest element in an array.
17. Write a program in C to find the second smallest element in an array.
18. Write a program in C for a 2D array of size 3x3 and print the matrix.
19. Write a program in C for addition of two Matrices of same size.
20. Write a program in C for subtraction of two Matrices.
21. Write a program in C for multiplication of two square Matrices.
22. Write a program in C to find transpose of a given matrix.
